

Présentation du Projet

Le Site Vitrine avec Formulaire Chiffré est un site d'entreprise moderne accompagné d'un formulaire de contact hautement sécurisé. Il intègre un chiffrement des données (AES côté client / RSA côté serveur) , ainsi qu'un système anti-spam par honeypot . Ce projet démontre la capacité à développer une solution frontend/backend complète, sécurisée et conforme aux bonnes pratiques de protection des données.

Fonctionnalités

✅ Formulaire de contact sécurisé par chiffrement hybride AES/RSA

✉️ Envoi des messages confidentiels chiffrés au backend

🕵️♂️ Système honeypot anti-bot (invisible pour les utilisateurs humains)

📄 Sauvegarde des messages dans MongoDB

📱 Site responsive , affichage optimisé sur mobile / tablette / desktop

🎨 Design moderne, professionnel et fluide

🔒 Aucun message n'est transmis en clair

Design UI / UX

- Thème professionnel clair ou sombre
- Interface épurée et fluide
- Accessibilité optimisée
- Transitions douces pour l'expérience utilisateur

Architecture Technique

| Frontend | React | Formulaire + chiffrement AES + UI |

| Backend | Node.js + Express | Réception, déchiffrement RSA, stockage |

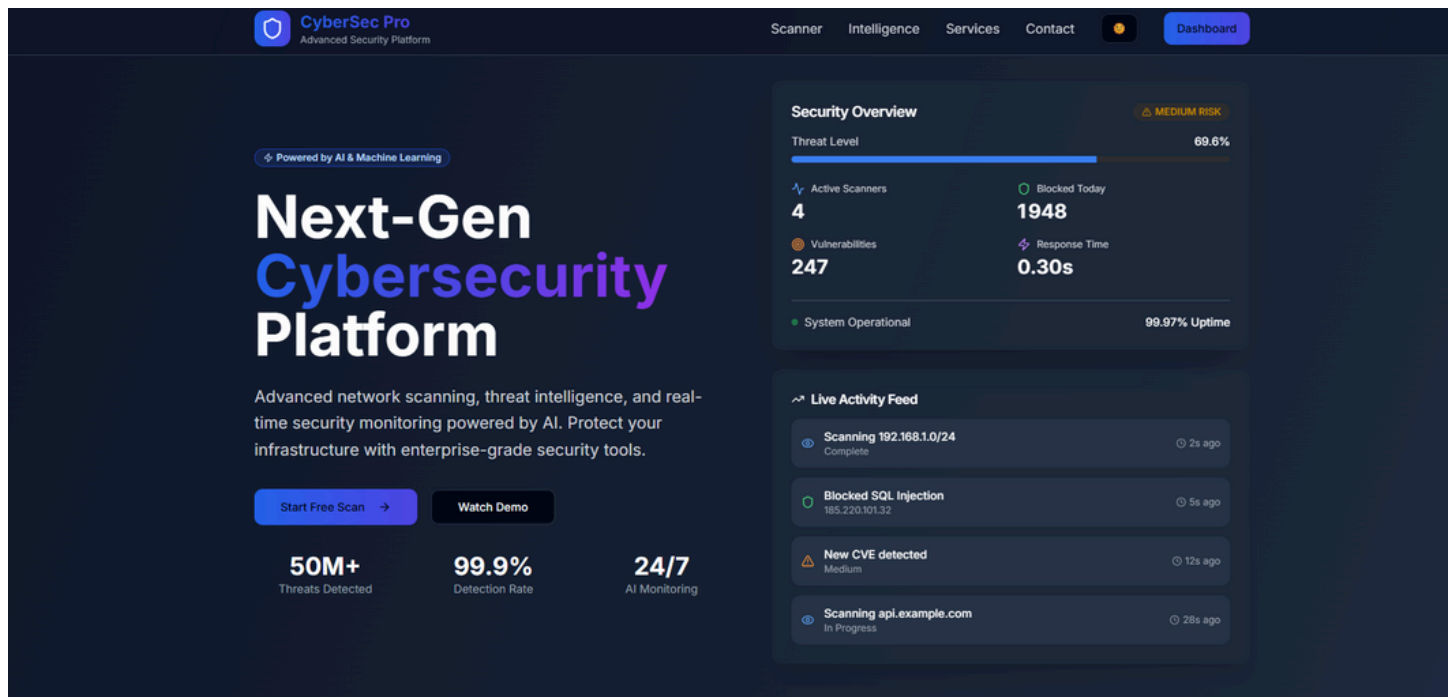

| Crypto | CryptoJS (AES), Node-RSA (RSA) | Sécurité des données |

| Base de données | MongoDB | Stockage des messages en sécurité |

| Sécurité | Honeypot, CORS, Helmet | Protection contre les abus |

☆ Our Services

Comprehensive Security Solutions

From penetration testing to incident response, we provide end-to-end cybersecurity services for modern enterprises.

Penetration Testing

Comprehensive security assessments to identify vulnerabilities before attackers do.

- ✓ Web App Testing
- ✓ Network Penetration
- ✓ Social Engineering

Starting at \$2,999

Learn More

SOC as a Service

24/7 security operations center monitoring and incident response.

- ✓ Real-time Monitoring
- ✓ Threat Hunting
- ✓ Incident Response

Starting at \$1,499/mo
